EMPOWER your STUDENTS to make wise financial decisions with ECONOMICS.

Economics prepares students to analyze economic concepts, systems, and policies with depth and clarity. With a conversational tone, real-world applications, and engaging features, students move beyond theory to evaluate economic decisions at personal, national, and global levels. Biblical worldview shaping is integrated throughout, helping students connect economic reasoning with values such as stewardship, work, and ethical responsibility.

HOW WE TEACH IT

We teach economics through a structured lesson cycle that moves students from engagement to assessment.

Each lesson follows the Engage-Instruct-Apply-Assess teaching cycle. Students begin with activities like entrance tickets or word clouds, receive direct instruction supported by visuals and discussion, apply concepts through collaborative strategies such as Think-Pair-Share and graphic organizers, and demonstrate understanding through exit tickets and comprehension checks.

We teach through guided analysis of real economic data, models, and case studies.

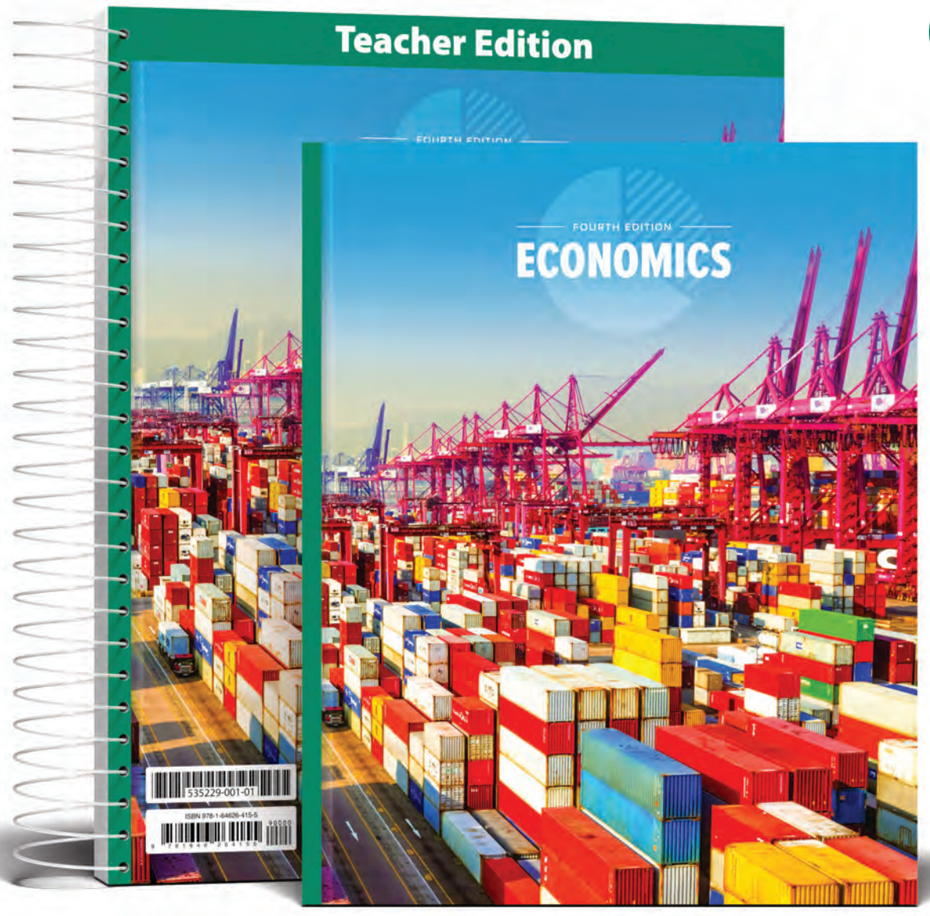

Students regularly interpret charts, graphs, and provided datasets instead of only reading theory. Case studies and structured analysis activities help them apply economic reasoning to real-world situations such as markets, regulation, inflation, and international trade.

We teach economics through active learning strategies that require student participation and discussion.

Instruction includes Think-Pair-Write, role-playing, brainstorming, roundtable reviews, and visual analysis. These strategies help students actively process economic concepts, encouraging them to explain, debate, and apply ideas.

We teach economics by including biblical worldview discussion directly into instruction and application.

Biblical worldview shaping (BWS) is embedded throughout lessons using structured prompts and teacher guidance. Students evaluate topics such as work, stewardship, private property, institutions, and economic systems through biblical categories and apply them in discussion and decision-making.

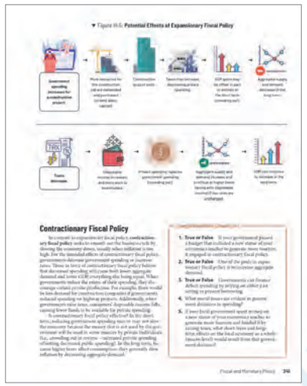

eTexts of student and teacher materials, along with resources referenced in the Teacher Edition, are available in BJU Press Trove.

MATERIALS

Student Edition

Empower your students to make wise financial and economic decisions with this 432-page, full-color *Economics* Student Edition. Written in a conversational tone, it makes complex concepts clear and engaging while guiding students to think critically about real-world economic issues. Through feature boxes, data-driven examples, comprehension checks, and chapter reviews, students build an understanding of economics, apply economic reasoning, and prepare confidently for assessments.

Teacher Edition

A comprehensive spiral-bound resource, *Economics* Teacher Edition includes structured lesson plans built around the Engage-Instruct-Apply-Assess teaching cycle. It provides teaching strategies, biblical worldview shaping guidance, differentiated instruction, digital resource integration, and assessment support.

Activities

A companion resource with 2–3 activities per chapter, *Economics* Activities includes case studies, data analysis, research tasks, and practice exercises. Each chapter also includes a review activity formatted as a practice test to reinforce mastery.

Activities Answer Key

The Activities Answer Key includes all of the answers for the Activities.

Assessments

The Assessments is a complete set of chapter tests (15 total) designed to evaluate student understanding of key concepts.

Assessments Answer Key

The Assessment Answer Key includes all of the answers for the Assessments.
